About Me

I have experience in backend development, system design, and API integration. Currently studying at 42 Bangkok and pursuing a mathematics degree at Ramkhamhaeng University. I have a strong interest in aerospace and complex engineering systems. I enjoy solving challenging problems, building scalable systems, and continuously exploring new technologies. Committed to resilience, lifelong learning, and pushing the boundaries of innovation.

Experience

Developed a web platform that provides ready-to-use business solutions, integrating Stripe for seamless payments.

Designed and implemented services using Golang (Fiber), Python (FastAPI) with PostgreSQL, MongoDB.

Applied Hexagonal Architecture for maintainability and Domain-Driven Design (DDD) to improve system scalability.

Integrated Redis for caching and optimized service performance.

Skills

Languages: Python, Golang, C/C++, Dart (Flutter), JS/TS

Frameworks: FastAPI, Fiber, Next.js

Databases: PostgreSQL, MongoDB, Redis

System Design: Microservices, Hexagonal Architecture, Domain-Driven Design

Tools & Platforms: Stripe API, Docker, Git

I love chocolate.
